My training and interests lie at the intersection of social psychology, neuroscience, and positive psychology. Over the past decade, my research has focused on developing and testing innovative psychological interventions to positively transform our relationships to others and the world. In my current research, I attempt to reduce affective polarization by appealing to shared social identities. I am also passionate about open science, reproducible science, metascience, and data science using R (this CV was made in R).

- *Psychology of Consciousness: Theory, Research, and Practice, Group Processes and Intergroup Relations, Journal of Statistical Software, Scientific Reports, International Journal of Mental Health Promotion, Discover Sustainability, Journal of Contemplative Studies*

Open Science Netherlands – Dutch Research Council (NWO)
New York, New York, USA

Grant Reviewer — *2022-06 – 2022-06*

- Reviewed an Open Science NL Grant for the Open Science Infrastructure call

Canadian Positive Psychology Association (CPPA)
Montréal, Québec, Canada

Lead Student Ambassador & Co-founder, Student Ambassador Program — *2019-09 – 2022-12*

- Led 70 Ambassadors (blog, webinar, logo, Instagram, etc.), Editor-in-Chief (blog)

Quebec Positive Psychology Association
Montréal, Québec, Canada

Member of think-tank for the future of positive psychology in Québec — *2016-04 – 2022-12*

- Led development of freshly formed student division, various responsabilities

International Positive Psychology Association (IPPA)
Montréal, Québec, Canada

Regional Representative (for the province of Québec) of the Student Division (SIPPA) — *2017-12 – 2022-12*

- SIPPA newsletter, connecting local members, meetings, interactive map

Department of psychology (Université du Québec à Montréal)
Montréal, Québec, Canada

Yoga & Meditation Student Committee Lead — *2019-01 – 2022-12*

- Led or organized meditation and yoga sessions, secured grants ($2198) for affordable classes and campus well-being

International Society of Hypnosis and the Québec Hypnosis Society
Montréal, Québec, Canada

Conference Reviewer — *2018-08 – 2018-08*

- Reviewed abstracts for the XXI World Congress of Medical and Clinical Hypnosis

Software I Developed

R Packages

R packages are modular, open-source tools that extend the functionality of the R programming language—the leading open-source tool for statistical analysis. These packages simplify complex statistical workflows, automate reporting, and promote good research practices.

Lüdecke, D., Makowski, D., Patil, I., Ben-Shachar, M. S., Wiernik, B. M., & **Thériault, R.** (2025). *see: Model visualisation toolbox for 'easystats' and 'ggplot2'* (R package version 0.11.0.8) [Computer software]. `https://doi.org/10.32614/CRAN.package.see` and `https://easystats.github.io/see/`. Complements numeric summaries from easystats packages with functions to generate publication-ready visualizations of model parameters, predictions, and performance diagnostics.

Makowski, D., Lüdecke, D., Ben-Shachar, M. S., Patil, I., & **Thériault, R.** (2025). *modelbased: Estimation of model-based predictions, contrasts and means* (R package version 0.9.0.41) [Computer software]. `https://doi.org/10.32614/CRAN.package.modelbased` and `https://easystats.github.io/modelbased/`. Helps researchers extract and visualize model-based

predictions, marginal means, and contrasts from complex models such as generalized linear models, mixed models, or Bayesian models.

Lüdecke, D., Makowski, D., Ben-Shachar, M. S., Patil, I., Waggoner, P., Wiernik, B. M., & **Thériault, R.** (2024). *performance: Assessment of regression models performance* (R package version 0.10.9) [Computer software]. `https://doi.org/10.32614/CRAN.package.performance` and `https://easystats.github.io/performance/`. Offers standardized, user-friendly functions to evaluate goodness-of-fit, residual diagnostics, and model comparison metrics across a variety of regression models.

Makowski, D., Wiernik, B. M., Patil, I., Lüdecke, D., & Ben-Shachar, M. S., & **Thériault, R.** (2023). *correlation: Methods for correlation analysis* (R package version 0.8.4) [Computer software]. `https://doi.org/10.32614/CRAN.package.correlation` and `https://easystats.github.io/correlation/`. Simplifies correlation analysis by offering user-friendly functions for computing, visualizing, and reporting various types of correlations, including partial, robust, and Bayesian correlations.

Lüdecke, D., Makowski, D., Ben-Shachar, M. S., Patil, I., Wiernik, B. M., Bacher, E., & **Thériault, R.** (2023). *easystats: An R framework for easy statistical modeling, visualization, and reporting* (R package version 0.6.1) [Computer software]. `https://doi.org/10.32614/CRAN.package.easystats` and `https://easystats.github.io/easystats`. Serves as a wrapper for the easystats ecosystem, providing an integrated and consistent interface for statistical modeling, effect sizes, visualizations, and standardized reporting.

Makowski, D., Lüdecke, D., Patil, I, **Thériault, R.**, Ben-Shachar, M. S., & Wiernik, B. M. (2022). *report: From R to your manuscript* (R package version 0.5.6) [Computer software]. `https://doi.org/10.32614/CRAN.package.report` and `https://easystats.github.io/report`. Automatically generates APA-style summaries and statistical descriptions from models and tests, streamlining manuscript preparation and reproducible reporting.

Ben-Shachar, M. S., Makowski, D., Lüdecke, D., Patil, I., Wiernik, B. M., & **Thériault, R.** (2022). *effectsize: Indices of effect size* (R package version 0.8.2) [Computer software]. `https://doi.org/10.32614/CRAN.package.effectsize` and `https://easystats.github.io/effectsize`. Calculates and interprets a wide range of standardized effect sizes (e.g., Cohen's *d*, eta-squared) for regression, ANOVA, and non-parametric tests.

Thériault, R. (2022). *lavaanExtra: Convenience functions for lavaan* (R package version 0.1.0) [Computer software]. `https://doi.org/10.32614/CRAN.package.lavaanExtra` and `https://lavaanExtra.remi-theriault.com/`. Extends the capabilities of the *lavaan* package for structural equation modeling by providing automated APA-style table output and more customizable path diagrams.

Thériault, R. (2022). *rempsyc: Convenience functions for psychology* (R package version 0.0.7) [Computer software]. `https://doi.org/10.32614/CRAN.package.rempsyc` and `https://rempsyc.remi-theriault.com`. Offers convenience functions tailored to psychological researchers, simplifying common tasks such as statistical tests, assumptions checks, and APA-style visualizations and tables.

Visualization Dashboard

This dashboard draws on data from nearly 60 journals and over 100,000 articles to highlight and track the under-representation of Global South authors in behavioral science to empower institutions, journals, and researchers to benchmark and improve their equity efforts.
